September 25, 2019

Dear Health Care Professional,

Earlier this year, Merck communicated the decision to discontinue the 10-pack of single-dose vials of GARDASIL[®]9 (Human Papillomavirus 9-valent Vaccine, Recombinant) and to solely offer the 10-pack of single-dose prefilled syringes. This decision was not related to any product safety or manufacturing issues with GARDASIL 9.

Merck has now depleted its inventory of the 10-pack of single-dose vials and is no longer offering vials for purchase. You may be able to purchase the 10-pack of single-dose vials through wholesalers and physician distributors until they deplete their remaining inventory.

Merck has adequate supply of the 10-pack of single-dose prefilled syringes of GARDASIL 9 to cover the discontinuation of the 10-pack of single-dose vials in the United States. Please note that the 10-pack of single-dose prefilled syringes of GARDASIL 9 is priced the same as the 10-pack of single-dose vials.

We thank you for your business and commitment to Merck Vaccines.

If you have any questions, please contact your Merck account representative or call the Merck Vaccine Customer Center at 877-VAX-MERCK (877-829-6372).

Sincerely,

Merck Professional Services
