A Clear Recommendation From You Can Help Your Patients Decide to Get Vaccinated.

Strengthening the Vaccine Provider Network

Consider these 4 steps as part of a vaccine recommendation:

1

Share a personal or professional experience about the real impact of the disease.

2

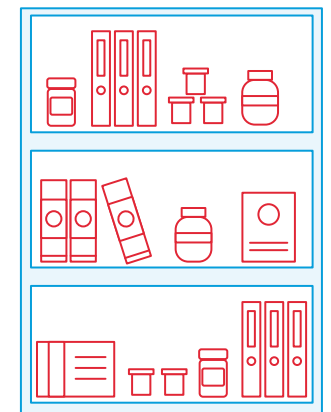

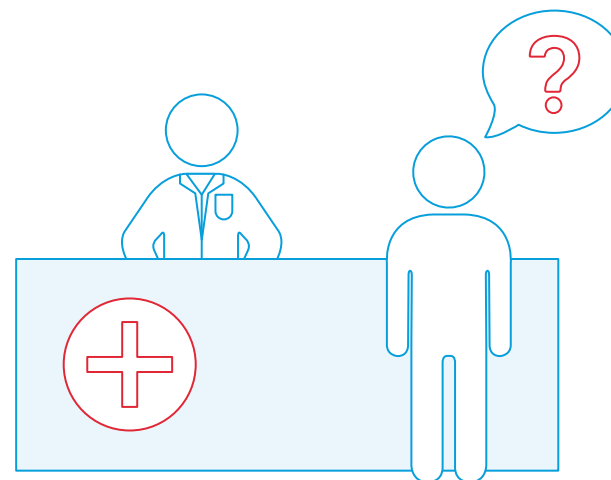

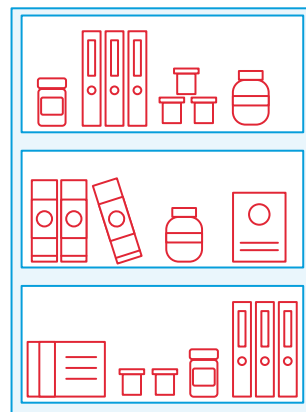

Explain the CDC recommendations for each vaccine you recommend.

3

Discuss the benefits and risks of each vaccine.

4

Let your patients know why you believe they should be vaccinated.

Patients want more than just information — they want your advice on vaccination.

For tips and tools to help you develop a clear recommendation for your patients, visit [MerckVaccines.com/recommend](https://www.MerckVaccines.com/recommend).
