## Skills Checklist for Vaccine Administration

The following checklist contains a selection of important skills and practices related to vaccine administration that can be used as an assessment tool for health care staff who administer vaccines.

Self-Assessment Supervisor Review			or Review	
	Meets or Exceeds	Needs to Improve	Meets or Exceeds	Patient Education
			П	Welcomes patient and establishes rapport.
				Explains what vaccines will be given.
				Answers questions and accommodates language/literacy barriers and special needs of patients.
				Provides Vaccine Information Statements for all vaccines and allows time for discussion.
				Screens for contraindications and precautions.  Reviews comfort measures and after care instructions as needed.
				neviews confloit fileasures and after care instructions as fleeded.
Self-Assessment Supervisor Review  Needs to Meets or Needs to Meets or			:	Medical Protocols
	Exceeds	Improve	Exceeds	Wodiour Fotocolo
				Can quickly locate medical protocols (ie, vaccine protocol, emergency protocol, reference material).
				Can quickly administer emergency protocol (eg, epinephrine administration) if necessary.
				Is up to date on CPR certification.
				Reports any needlestick injury.
Self-Ass	essment	Supervise	or Review	
Needs to	Meets or Exceeds	Needs to	Meets or	Vaccine Handling
IIIIprove		Improve	Exceeds	Checks vial expiration date. Double-checks vial label and contents prior to drawing up.
				Follows Prescribing Information for needle selection, reconstitution, and other specifics.
				Demonstrates knowledge of proper vaccine handling. (See Checklist for Proper Vaccine Storage
				and Handling.)
